

Attestation

On 6 March 2019, Eurofins Product Testing A/S received a sample of tile adhesive with the product name:

MONOTACK H BOND (grigio / grey)

supplied by

Nord Resine Spa

The product was tested for VOC emissions according to the requirements of the French legislation (order of April 2011) concerning the labeling of construction products or coverings of walls or floors and paint and varnishes on their emissions of volatiles pollutants.

Sampling, testing and evaluation were performed according to ISO 16000 in its latest versions, see test report no. 392-2019-00092901_A_EN.

The tested sample MONOTACK H BOND (grigio / grey) has been selected by the customer as being representative for the product range of BETON H1, MONOTACK SUPER (BIANCO, GRIGIO / white, grey), MONOTACK FLEX BASE (BIANCO, GRIGIO / white, grey), MONOTACK SR (BIANCO, GRIGIO / white, grey), MONOTACK FLEX (BIANCO, GRIGIO / white, grey), MONOTACK FLEXORAPID, MONOTACK MARMORAPID and MONOTACK H BOND (BIANCO / white) which according to the information of the manufacturer are based on the overall same chemical composition. The tested product MONOTACK H BOND (grigio / grey) is considered to be the "worst-case"-product regarding VOC emissions.

In accordance with legislative requirements, the test results can be summarized as follows:

*Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

The product was assigned a VOC emission class without taking into account the measurement uncertainty associated with the result. As specified in French Decree no. 2011-321 of March 23, 2011, correct assignment of the VOC emission class is the sole responsibility of the party responsible for distribution of the product in the French market.
